# EHA-SWG Scientific Meeting on Red Cell and Iron Metabolism Defects: From Basic Science to Clinical Case Application

November 7-9, 2019 | Madrid, Spain

[ehaweb.org](http://ehaweb.org)

**EHASWG**  
SCIENTIFIC WORKING GROUPS

Chair

Achille Iolascon

**Would you like to learn more about red cells and iron biology  
in relation to the erythropoietic differentiation process?**

Join us in Madrid to learn more about new treatments of red cells and iron metabolism diseases and how to diagnose them.

## About the meeting

You will improve your understanding of the learning protocols for differential diagnosis and the treatment of various types of anemias. The meeting contains clinical cases of unsolved anemias.

## Register now

Register for this three-day scientific meeting before September 27, 2019 (23:59 CEST) and benefit from the early registration fee.

## Submit a clinical case

Submit a clinical case before September 6, 2019 (23:59 CEST) for inclusion in the meeting program and discuss it with the international faculty and your peers. Oral and poster presentations will be held throughout the meeting.

## Program topics

- **Thalassemias**
- **Sickle cell disease**
- **Diserythropoietic anemias**
- **Red cell enzyme defects**
- **Atypical microcytic anemias**
- **Hereditary hemochromatosis**
- **Iron metabolism**
- **PNH**

This meeting is part of the Topics-in-Focus (TIF) program on hemoglobinopathies.

TOPICS-IN-FOCUS  
Hemoglobinopathies
